PROFILE SUMMARY

I am a dedicated and passionate UI Frontend Developer with a strong foundation in web development technologies such as HTML, CSS, JavaScript, and popular frontend frameworks like React. With practical experience in creating responsive and user-friendly web applications, I prioritize clean, maintainable code and seamless user interactions. My focus is on designing engaging user interfaces while ensuring performance, accessibility, and cross-browser compatibility. I am enthusiastic about contributing my skills and growing as part of a dynamic development team, continuously learning and applying new technologies to build innovative and scalable web solutions. Eager to be a valuable asset to your team.

Question and Answer Hub

Technologies Used: html, Css and JavaScript, J query, Bootstrap, React.js, Node.js, MongoDB.
Description: Quora is a community-based questions and answers website and app.Either make a Comment directly under your Question with those details -OR- Answer your own Question with those details with the disclaimer at the top of the Answer: "Details for this answer...". Asking questions on Quora does not directly earn you money. Quora is a platform where you can ask and answer questions, and the purpose of the platform is to share knowledge and help people find answers to their questions. However, Quora does have a Partner Program that allows users to earn money through their writing.
Role: ("Frontend Developer" ,"Backend Developer)

3 Months

Protect and Serve
